PERSONAL PROFILE

Web developer, with a strong foundation in creating and maintaining websites and web applications.

Responsibilities include collaborating with design and development teams to translate designs into functional web pages and applications, implementing front-end features using HTML, CSS, and JavaScript, writing and testing code, debugging and fixing issues, participating in code reviews, and ensuring that the website or application is responsive and works across different devices and browsers. I am experienced in working with APIs and integrating third-party tools and services, and am able to contribute effectively to projects of various sizes and complexity.

Key front end skills

- HTML, CSS, and JavaScript
- Responsive design and mobile-first development
- React
- Git
- Debugging
- Accessibility standards
- Cross-browser compatibility
- Problem-solving

Professional Experience

My Little Water World - Shrimp Farm Owner

Jun '22

Aqualand Trade LTD

Bristol - Bradley Stoke

- I managed the entire operation, from the daily operations of ordering supplies, managing inventory, marketing and promoting the shrimp, to the financial operations of tracking income and expenses. I also handled customer service inquiries and provided assistance to customers. Additionally, I managed the production side of the business by ensuring the shrimp were bred, raised, and shipped out in a timely manner.
